

# Fire Management and Fire Ecology

## Community Information Session

This community information session aims to help participants understand the effects of fire and how fire plays a role in biodiversity management. Participants will also learn how the various authorities prepare and manage the natural environment for bushfire.

### Fire Ecology

- ◇ How our understanding of bushfires and ecology has developed - 1970 to 2010

### Vegetation responses

- ◇ Plant regrowth and bushfire fuels
- ◇ Bushfire behaviour - what controls it and can we modify it?
- ◇ Fire behaviour in a semi-urban area
- ◇ A landscape approach to fuel management.

### Reducing the impacts of bushfires on your property

- ◇ How houses catch fire
- ◇ Strategies to reduce house ignition/loss
